

Questions & Final Considerations.

“Whether you think you can do it or you think you can’t, you will always be right.”

As always happens, there will be those who have followed what has been shown with great attention and growing enthusiasm and will be able to grasp its essence and create the vision and certainty they need to achieve stratospheric results.

While unfortunately, at the other extreme, there will also be those who have not even arrived at the first minute of the first video. It’s normal.

That’s the way the world goes.

But we, all together, more and more numerous year after year, by helping and educating people, can make a concrete contribution to smooth out inequalities by increasing the wealth of an enormous number of families. Studies show that 10% of adults share 85% of the world’s wealth.

At the same time, the remaining 90% is divided up by the remaining 15%.

And certainly not because wealth is limited.

Indeed, we must certainly not take away from the rich to give to the poor.

There is not the slightest need! If we do our part, perhaps we will not change the world’s fate, but we will be sure that we have done everything in our power to bring serenity, joy, and prosperity to many people.

How many? Anyone who wants to believe in this project.

Poverty is not eliminated by increasing the number of rich who care for the poor but increasing the number of poor who are confidently committed to becoming rich.

Deo Juvante!
