

The magic of Clubshop's fe-Commerce leverage effect

We said that to gain the right to earn income from thousands of people worldwide, you don't need to invite anyone to join or invest anything. You automatically earn this right when you purchase at any of Clubshop Mall's retailers and earn cashback, even from just a single purchase in a month.

It's more than fair. Isn't it?

Your success keys:

Support our Ethical & Fair vendors generously.

If, per what we just repeated above, you are not obliged to invite anybody to get the right to earn an income from your Clubshop Mall's Global Market, how can you even have someone in your Clubshop's Global Market?

Well, again, we trust in people's common sense. Let's say, for any reason, you don't want to invite anybody to join our Fair & Ethical movement. No problem!

Our exclusive and proven TNT (Taproot Networking Technique) works for you.

Statistically, it's proven that ordinary people naturally tend to use their common sense positively.

For example, if you know, because you personally did the experience, that thanks to the Clubshop fe-Commerce ecosystem, you're saving money on your usual shopping, would you keep it secret?

Don't you think that if you're positively amazed by the money you saved, you would naturally tell that your spouse,

siblings, closest friends, or whoever is still wasting money because they don't know fe-Commerce yet?

Well, maybe you want to keep the secret for who knows what reason. And it's fine. But, even tough, two things will happen:

1. **FREE Spontaneous Duplication:** Statistically, other people who form part of your same Clubshop's TNT Global Market will undoubtedly inform others about FREE fe-Commerce, either by word of mouth or by marketing the fe-Commerce concept online or offline. And, once new incoming people are aware of the same FREE fe-Commerce privileges because they personally did the experience, they'll tend to use their common sense too. That is enough for you to rapidly see the expansion of your global market thanks to our exclusive TNT.
2. **VIPs contribution:** Clubshop Vested Income Partners or VIPs are those Clubshop Members who not only want to be "active" Members but also want to operate in a more professional way to help the fe-Commerce movement development because they love Clubshop's fe-Commerce concept and mission. So every Clubshop Member, at any time, can decide to [purchase a Global Partner System \(GPS\) subscription](#), to instantly get the Clubshop's exclusive turnkey Marketing and CRM Platform that provide them with all the advanced tool they need to operate professionally but with the minimum effort to build even faster their and other people's FREE Global Market. It means that all the results VIPs generates thanks to their work with the GPS, will **contribute to expand also YOUR TNT FREE Global Market**. VIPs have a great additional incentive in helping you, because they also have the right to earn an additional income stream called "Leadership Income." If you want to know what this leadership income looks like, please see the VIP Compensation Plan.

Team spirit at work: The powerful 1% of 100 other people's efforts concept.

If there is no walk, there is no perception of the things that need to be done.

Infinite Intelligence, 5/1/2013 at 6.33.

Let's say your goal is to achieve the goal we're often giving as a practical example: to tap into a FREE Global Market of 10,000 consumers who earn cashback and other savings on their regular shopping. Forecast, they'll generate a \$1 monthly average commission for you.

Suppose you had to create a 10,000-people's market with 100% of your effort.

In that case, you should invest, risk and lose loads of money in marketing and advertising, plus an infinite amount of time to learn about marketing and advertising and then to put in practice what you learned.

Odds are you would not even start.

Now see the next lesson to understand the compounding effect generated by the spontaneous action of 140 satisfied e-Commerce consumers and its effect on your income.
