01 Intro

Who are the real scammers?

If you're reading this book, it's probably because you're still wondering if **Clubshop offers a legitimate business opportunity** or it's just another scam.

We know that sometimes you can see someone on the internet, popping up from nowhere, using the super scary word "Scam" to define our beloved business.

So, we think you deserve to know the truth directly from the people who, based on those anonymous entities' affirmations, are supposed to be the scammer.

As you probably don't have time to read the entire document until the end to read the answer, we start right from that:

NO! Clubshop is NOT a scam!

You can sleep in total serenity and make sweet golden dreams while building your online business with us.

Clubshop is active on the global market since 1997, and is here to stay.

Enjoy the reading, and please promise you won't laugh when you read some incredible bullshit brought on by some vulgar slanderer.

One of those slanderers, who are the real scammers, whose only aim is to pursue their shady interest by doing all they can do to fool you with an avalanche of misinformation.

Just pray for them to help them get out of the hell they must be living on earth rapidly.

01 The parasite industry

It sounds incredible, but it's true:

There is a parasite industry that has been spreading on the internet over the years. It's the industry of fake reviews and feedback.

It sounds incredible, but it's true: we have some humans who, instead of looking for a job or building a legitimate and useful business, spend their time trying to suck traffic from other companies and direct it to their meaningless websites where the only thing they do is slander whoever they want.

They obviously hide their slandering under the aspect of a so-called "review."

For their criminal activity, they usually target successful companies because that's where the traffic is.

They even try to be credible, hoping that the next time you'll go again to their website to look for another "review."

If you have time to waste, keep reading this eBook to see how they manipulate reality to attain their scope.

Of course, they never show their names, address, or any other evidence of their identity, as <u>they know that slandering is a</u> <u>criminal offense.</u>

01 The parasite industry

Why do they do that?

They usually have three main reasons:

- 1. They display some google ads or similar on their pages to earn peanuts for each page view.
- 2. They place "suggestions" about other "businesses" from which they hope to profit on the same slandering page.
- 3. Others may even be just angry people who didn't accept a "NO" from a Company to some of their weird requests and decided to attack them.

I know, especially the two first reasons sound a bit pathetic, not just because this unfair strategy leads them to earn nothing. But mainly because you can imagine what kind of little and frustrating life a person managing that kind of criminal website is living.

Now you know three of the main reasons why this kind of small minds keep wasting their time trying to harm what other people, unlike them, are honestly building. Among these people, we can also mention jealous competitors.

The universe judges them and gives them back every day what they deserve.

Of course, Clubshop is not perfect, but you can rest assured that we keep busy building and enhancing, day after day, the best people's business platform ever existed. In the meantime, we are happy to receive all kinds of genuine and constructive criticism. But not fake and destructive reviews driven by anger, jealousy, and third parties' interests.

Real fake review case.

Lately, someone brought to our attention one of those articles posted by the typical traffic parasite.

It's a perfect example of how these useless beings manipulate the truth to fool uninformed and naive readers to pursue their interests.

In the following pages, we examine every section of their article to unmask the unfair manipulation they perpetrate in every paragraph.

So you can understand their modus-operandi and get the awareness you need each time you encounter a parasite of the same species.

At the same time, we wonder how a smart person can waste such a big part of their life focused on destroying what honest people are trying to build?

Everyone will find their answer.

4	Here, they try again to scare the reader by bringing a piece of generic information about the United Kingdom (this manipulator is undoubtedly not a British citizen :)). Pathetic manipulation that sounds like ALL MLM companies incorporated in the UK were scammers. Proprofit included.
ClubShop's website domain ("clubshop.com") was first registered in June 1997. The domain registration was last updated on June 19th, 2020.	It's like if you said: "US law allows people to buy weapons. Criminals buy weapons, so if you go to America you're a criminal."
Proprofit Worldwide is listed as the owner, through an address in London, UK. This syncs with the UK incorporation details referenced above.	What silly person would say that?

5	A search for ClubShop's CEO returned an <u>ancient 2006 press-release</u> naming Dick Burke.	This part would be of no importance if the reader's mind were not influenced and manipulated from the beginning. But unfortunately, that's not the case.
	This led me to Richard Burke (right), who cites himself as ClubShop's President on LinkedIn. As per Burke's LinkedIn profile he's based out of Englewood, Florda.	Again, a naive and uninformed reader could think that if Mr. Burke resides in Englewood, Florida, while Clubshop is now in London, UK, something is wrong. The truth is that, as also explained above, Mr. Burke, who truly resides in Englewood, Florida, sold Clubshop to Proprofit Worldwide Ltd., the current Clubshop's owner.

Mr. Perotti is very active and helpful on the leading social platform, proud of what he's doing for people worldwide.
	As above the CEO wasn't named. He does however feature in other ClubShop blog posts and is named Fabrizio Perotti. On LinkedIn Perotti (right) cites himself as a Director of Proprofit Worldwide. To summarize; ClubShop is run by former affiliates Fabrizio Perotti and Giuseppe Francavilla (right). Perotti is from Italy but now resides in Portugal. Francavilla still resides in Italy. ProProfit Worldwide is a UK shell company and, unless I'm missing something, ClubShop currently has no ties to the US. Read on for a full review of ClubShop's MLM opportunity.	This part is nothing more than the truth. But he says: <i>"This is presumed to be the current ClubShop MLM opportunity iteration."</i> He knows very well that the blog post he mentioned is about Clubshop. But he uses the words <i>"presumed to be"</i> to give a feeling of a suspicious thing. Why does he do that? Because slanderers typically manipulate positive things, knowing that readers will perceive them as negative due to the manipulated filter they previously created in the reader's mind. The truth is that Clubshop and its owners are so transparent that everybody can quickly get all the information they need about them everywhere. Nothing to hide, so, no need to get the data from this new fake Sherlock Holmes.

10 ClubShop's Compensation Plan

ClubShop refers to its MLM opportunity as GPS; Global Partner System

GPS includes all you need to run your own business and make your entrepreneurial life easier while you work to achieve your goals.

There are seven GPS affiliate membership tiers:

- Basic \$14.90 a month
- Basic Plus \$29.90 a month
- Pro \$49.90 a month
- Pro Plus \$89.90 a month
- Premier \$129.90 a month
- Premier Prosperman not disclosed

MLM Commission Qualification

ClubShop affiliates have two options to qualify for MLM commissions

1. recruit and refer affiliates/members who purchase products through ClubShop's ecommerce platform

2. pay ongoing affiliate membership fees

ClubShop's official compensation documentation states method two is 'the easiest, fastest, and most secure way to get and keep qualified'.

Recruitment Commissions

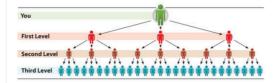

ClubShop affiliates earn a 50% commission on the first monthly fee paid by personally recruited affiliates.

This 50% commission is also paid out when a personally recruited affiliate upgrades their membership tier.

Residual Recruitment Commissions

ClubShop pays residual recruitment commissions via a unilevel compensation structure.

A unilevel compensation structure places an affiliate at the top of a unilevel team, with every personally recruited affiliate placed directly under them (level 1):

If any level 1 affiliates recruit new affiliates, they are placed on level 2 of the original affiliate's unilevel team.

If any level 2 affiliates recruit new affiliates, they are placed on level 3 and so on and so forth down a theoretical infinite number of levels.

Real facts

All the long part related to the compensation plan reported by the slanderer looks correct. Here on the left, you only see a part of that.

It describes some excerpt they got from the Clubshop's website.

But it's presented again in a way aimed to discourage any reader as it doesn't talk at all about one of the most crucial aspects of the entire GPS platform; the exclusive TNT (Taproot Networking Strategy), re-invented and enhanced throughout the years by Clusbhop.

TNT is the real game-changer. That's what makes Clubshop different from the crowd.

That's why the slanderer here doesn't talk at all about it.

GPS with TNT creates the outstanding potential every Clubshop's partner has, not only marketing gurus and specialists, as it puts Clubshop Partners businesses virtually on auto-pilot.

GPS takes care of all the most critical and challenging tasks required by any legitimate Network Marketing business.

To make it more straightforward: the income shown in the compensation plan represents the goals.

But GPS, with its TNT, is the vehicle that enables people to achieve those progressive goals.

Goals with no vehicle mean nothing.

That's why the slanderer didn't explain anything about the revolutionary GPS TNT power.

11		Here on the left, you see two other misleading affirmations.
		The truth is that Clubshop affiliate membership is 100% Free.
		You can even qualify as a partner for FREE, thanks to the purchases made by your personally referred members.

	their initial income potential.	The truth is that it's not the mere fact that you spend more that increases your earning potential. That would be wrong and unethical.
		Instead, what increases the subscriber's income potential are the enhanced marketing services included in each higher GPS type.

This is especially true when the only thing ClubShop itself sells through it compensation plan is affiliate membership. Moving on we have the guaranteed monthly returns. Your ultimate goal is to achieve the "Prosperman" Income title to enjoy the corresponding minimum monthly income of \$10,000 per month.	 Their "conclusion" keeps on with some more clear manipulation of the facts. Manipulation #1: "Let's start with the obvious; charging affiliates fees and paying commissions from those fees in MLM constitutes pyramid recruitment." The only "obvious" thing here is this fake statement itself. These slanderers are referring to some theoretical " affiliate fees that don't exist. We have already explained and underlined that Clubshop affiliation is 100% FREE. Everybody knows that. They know they are lying because what they are probably referring to are the GPS subscriptions. As we already said, GPS has nothing to do with the "affiliation." Instead, GPS is an advanced CRM and Marketing platform that Clubshop members can decide to subscribe to or not. Manipulation #2: "This is especially true when the only thing ClubShop itself sells through its compensation plan is affiliate membership." This statement is manipulative again because even if it's true that GPS is the leading service produced in house by Clubshop, it doesn't consider the whole business model, which is actually based on providing every GPS subscriber with an international shopping Mall and all the strategy, tools, training and support to help them build a large base of potential customers for their shopping Mall itself. So, instead of providing them only with an online shopping mall, we provide them with all they need to produce sales automatically throughout the years.

13	Let's start with the obvious; charging affiliates fees and paying commissions from those fees in MLM constitutes pyramid recruitment. This is especially true when the only thing ClubShop itself sells through its compensation plan is affiliate membership. Moving on we have the guaranteed monthly returns. Your ultimate goal is to achieve the "Prosperman" Income title to enjoy the corresponding minimum monthly income of \$10,000 per month.	 Manipulation #3: "Moving on, we have the guaranteed monthly returns." This sentence is entirely wrong. We never gave any guarantee of "monthly returns." Once more, they are merely manipulating the information they found on the Clubshop website to justify their nothingness. What instead is true is that if you have those specific conditions at the end of a given month, as clearly detailed in the compensation plan, you are certainly entitled to receive that particular income. And it's important to know that since 1997 Clubshop has always paid all its partners as guaranteed by its evolving compensation plan. The above is also a guarantee that Clubshop has nothing to do with Pyramid. Otherwise, how could a "Pyramid" stand on the market for more than twenty years? If it was a Pyramid like they try to let you think, then it's not true that the pyramid's destiny is to collapse in a short time?

	Fake statements and manipulations	Real facts
14		Again a clear example of data manipulation.
		Your ultimate goal as Clubshop Partner can indeed be \$10,000 per month. Nothing wrong with that. It's a highly motivating goal. It's not a promise of earnings like every honest person understands.
		Then, they post one of our compensation plan explanatory tables, together with two assumptions based on ignorance and bad faith as always.
	<text><text><text><text></text></text></text></text>	Unlike they say, Clubshop partners always know what they are supposed to receive from the e-commerce purchases because this is explained in the compensation plan.
		About not having any guarantee, common sense is much more useful than any form of "guarantee."
		As we are an open community where everybody freely interacts with everybody, can yo imagine how long Clubshop would last if we were not paying the due commissions to our members? Indeed, not 23 years like Clubshop did so far.
		Then, they continue their slandering using the words Ponzi scheme.
		Again, they are just ignorant people who show they didn't understand anything about Clubshop.
		As also shown in several videos available in our GPS training explains that in the first phase of its expansion, GPS is designed to build gradually, month after month, a global shared market of shoppers, affiliates, and partners for your Shopping mall.
		Every purchase these people can make at hundreds of Clubshop affiliated stores, including the Clubshop Outlet, generates cashback and a commission for Partners.

Your ultimate goal is to achieve the "Prosperman" Income title to enjoy the corresponding minimum monthly income of \$10,000 per month.

Ecommerce affiliate margins are slim enough as it is. There is no way mown ClubShop is paying guaranteed monthly returns from whatever they receive through their ecommerce platform. Manipulation <u>Manipulation</u> <u>Manipula</u>

Recycling said fees ties into the majority of commissions earned through recruitment, creating a closed-loop flow of money. Or in other words, a Ponzi scheme. A significant percentage of every eCommerce purchase generates profit for the Company too.

If, for example, you have at this moment a global shared market for your shopping center that includes 1000 Clubshop members (shoppers, affiliates, partners) and they generate an average of \$0.1 per month in monthly commissions, you are earning \$100 per month.

We designed the GPS to help you increase your shopping center's shared market size and the average monthly commissions it may produce throughout the years.

So, a partner who has 10,000 people in their shared market, after xx months or years, with an average of 1\$ in monthly commissions, earns \$10,000 per month. It's not rocket science. It's just math.

Does it mean that we guarantee that all partners will earn \$10,000 per month?

Of course not. Nobody is so stupid to think that.

16		The manipulator here keeps on presenting a fact that has never been a mystery at all, as if he discovered hot water. Tens of thousands of people know that Mr. Perotti, together with Mr. Francavilla, are the proud co-owners of Ad2Prosper, as already explained above.
	 This strongly suggests Perotti wasn't just promoting Ad2Prosper, he owned it. Ad2Prosper was a five-level deep pyramid scheme. ClubShop is the same fraudulent recruitment model, expanded by one level to six. TangiCoin appears to have initially been promoted on "tangicoin.org". Today that domain hosts a stock WordPress install. Manipulation 	 And, obviously, Ad2Prosper was not at all a "fraudulent recruitment model." A2P was selling useful advertising services to all kinds of online entrepreneurs. The manipulator is also lying when he says: <i>"TangiCoin appears to have initially been promoted on tangicoin.org."</i> The reality is that we never promote TangiCoin at all. We only bought the domain to have it still available when it is the right moment, and we have never used it so far.

	tangicoin.org	He shows the domain <u>tangicoin.org</u> as "misconfigured," "not private" and underlines that it is related to ad2prosper. Wow Another funny discovery that, in reality, has never been a mystery for anybody.
	Your connection is not private Attackers might be trying to steal your information from tangicoin.org (for example, passwords, messages or credit cards). <u>Learn more</u>	But, as he also noticed, and I already explained above, we never used the domain <u>tangicoin.org</u> at all. We only reserved it.
	NET::ERR_CERT_COMMON_NAME_INVALID Q To get Chrome's highest level of security, turn on enhanced protection	So, of course, on that website, you see nothing more than a "stock WordPress install," as he relates in the previous image.
	Hide advanced Manipulation Back to safety	So, as <u>tangicoin.org</u> is not an active website yet, it has no visitors at all. That's why it does not even have an HTTPS certificate.
	This server could not prove that it is tangicoin.org ; its security certificate is from ad2prosper.com . This may be caused by a misconfiguration or an attacker intercepting your connection.	Even a three-year-old understands this. And so does the slanderer. But he decided to manipulate even this situation, probably thinking that all his website's users are idiots.

18		Here, False-man keeps on with his denigratory campaign showing even more ignorance when he spreads more bullshit, starting by "I'm not sure," "perhaps."
	I'm not sure how many TangiCoins are out there, but there is this ERC-20shit token created 942 days ago. That's June 2018, the same year Perottipurchased ClubShop.Given the 425 TAG total supply, perhaps this was a prototype (ERC-20tokens take 2 minutes to set up).Manipulation	Then launch another great nothingness when he says: "ClubShop are awfully cagey about how TangiCoin fits into their compensation plan. Other than how much you get when you sign up, there is no mention of TangiCoin anywhere."
	ClubShop are awfully cagey about how TangiCoin fits into their compensation plan. Other than how much you get when you sign up, there is no mention of TangiCoin anywhere.	Dear manipulator, we are not "awfully cagey" about that. The point is that TangiCoin is not part of our compensation plan at all. That's why there is no mention of it anywhere. You are the only one building fantasies about all this matter.
19		Here False-man shows us he discovered the hot water again.A broken page. Sigh.It means a page that does not exist. It doesn't exist because TangiWorld, as we all know, is still an idea, a fantastic project that is not released yet.And we're certainly not going to disclose anything about it before the right time.

	Fake statements and manipulations	Real facts
20		Here again, we can read another set of statements based on pure ignorance and bad faith.
	I suspect ClubShop sets an internal TangiCoin value, letting affiliates withdraw their coins through an undisclosed internal exchange.	The manipulator starts by saying: <i>"I suspect."</i> Well, once more, his suspicions are sadly wrong.
	This is your typical MLM crypto Ponzi points model and would be the second-tier of ClubShop's Ponzi component.	Just to make it short, as everybody knows, no "undisclosed internal exchange" exists. It only exists in the manipulator's
	Certainly none of the third-party merchants on ClubShop's ecommerce provider won't accept TangiCoin. So other than speculative manipulated investment, TangiCoin serves no purpose.	nightmares. Consequently, even the second lie about what he defines as the <i>"typical crypto Ponzi points model"</i> is a complete fantasy
	Even if you discount the TangiCoin investment scheme, the guaranteed monthly returns ClubShop offers constitutes a securities offering.	issued by his deviated mind.
	Neither ClubShop, Fabrizio Perotti or Giuseppe Francavilla are registered to offer securities in any jurisdiction. Manipulation	No comment about the subsequent mental ruminations. Rumination that sounds very funny when we know that:
	This alone means ClubShop is operating illegally. Throw in pyramid recruitment and the business model goes from bad to worse.	TangiCoin at the moment is nothing more than a FREE Bonus.
		 TangiCoin has no circularity yet. TangiCoin has no value yet. Nobody has ever "invested" in TangiCoin.

21		Here he shows total ignorance and lousy faith once more when he shows an excerpt taken out of its context, with a personal consideration that has nothing to do with our business.
	Every Partner's goal is to gradually reinvest a part of their monthly earnings to upgrade to a higher GPS type, including	If he were in bonafide, he would have understood we offer six GPS subscription types, starting from the most affordable one at \$14.90. Each GPS type includes a higher content value in terms of services finalized to help you build a legitimate online business.

	As with all MLM Ponzi and pyramid schemes, once affiliate recruitment dries up so too will returns and commissions. Manipulation	what you earned to keep expanding even more once you start to have a profit.
		The above is something that a wise entrepreneur would do even without waiting for someone to tell them.
		But, as we designed GPS to allow also the average person to be successful, we often need to give them useful tips and insights, just like we did in this excerpt that the manipulator used once more to keep on with his dirty slandering strategy.

	Fake statements and manipulations	Real facts
22		He brings an obvious thing as a weird thing. Every Partner is a business in itself, and we deliver his GPS instantly after the payment. Including the COOP advertising shares. To understand better, let's say you own a traditional business, like a bakery, for example. You sell bread, and you allow
	GPS is under a strict NO-REFUND policy, and no refund is possible under any circumstances.	refunds. You allow people who didn't eat your bread for whatever reason to come back when they want and ask for a refund. Of course, you would go broke in no-time.
	This will prompt a collapse, resulting in the majority of affiliates losing money. Manipulation	So, dear manipulator, where's the scoop in this nth nothingness that you posted?
		We offer a transparent and fair FREE Trial Program to allow people to see GPS from inside before buying it.
		And yes, we state clearly, and we're proud of that. We have a NO-Refund policy in place. So people can decide to buy GPS or not to be aware of the policy.

	Fake statements and manipulations	Real facts
23		Finally! He almost arrived at the end of his giant jumble of bullshit, but he still feels the need to manifest his ignorance once more. This time about the advertising coop.
		He says: "sounds bullshit because it probably is."
		This sentence is another clear example of how he keeps trying to manipulate reality to let people perceive all good, positive things as bad, shady junk.
	One last thing I want to touch on is ClubShop's advertising coop. I'm a bi	Unfortunately, his wooden brain doesn't allow him to understand that we designed our business with the precise aim of allowing ordinary people to become successful in Network Marketing. 	Sounds bullshit because it probably is. And note the emphasis on recruited affiliates. The Advertising Coop only targets the business opportunity. Ignorance + bad faith	Mr. Perotti and Mr. Francavilla know this fact, having operated for about twenty years as simple affiliates in Network Marketing companies.
		They are both very grateful to Network Marketing because they've always been successful.
		They knew Network Marketing can be the best business concept available for ordinary people only if they could erase the severe challenges that standard programs always have. Lead generation is probably the heaviest one among them.
		That's why their dream and mission is to enable ordinary people to achieve their goals through Network Marketing.
		Or, even better, through the new and unique business model and strategy

23	<text><text><text><text><text></text></text></text></text></text>	 invented by Clubshop. The COOP is one of the unique aspects that makes the GPS a great vehicle to achieve the dream. The ignorant also says: <i>"The advertising COOP only targets the business opportunity."</i> First, he can't know what we're precisely targeting. Second, it's real and right that, on this first phase of the new Clubshop expansion, we target people worldwide who are actively looking for a serious business opportunity. Why? Because it's the most challenging thing to do for ordinary people who want to get leads for their business. Even because it's much easier for them to refer, even offline, all the potential shoppers they want personally, to let people earn cashback while they make eCommerce commissions simultaneously. It's important to know that just like any other legitimate NM business, Partners are also the first enthusiastic consumers of the products and services distributed by the company.
		In the next phase of our business plan, when we'll have a specific number of Partners, there will be a transition where we'll gradually close access to new partnerships and exclusively allow new shopper membership. We'll aim to achieve a shopper/partner rate of at least 100/1. That's our goal. But we can do even better than that.

24	For those of you still perhaps sitting on the fence regarding the legitimacy of ClubShop's ecommerce platform model, ask yourself this: If ClubShop's ecommerce platform was actually viable, why is the platform dead in countries it was once popular in? Manipulation Online shopping is as big as ever, so the problem obviously lies with ClubShop. Namely that ecommerce in the current business model is just a cover. Whether the platform is marketed or not is neither here nor there.	 Yeah! Finally, Mr. Slander achieved the end of this incredibly unfair, useless, fake thing that he calls "review." He finishes like he started: manipulating the truth. So, let's answer his rhetorical question and statement. 1. "If ClubShop's eCommerce platform was actually viable, why is the platform dead in countries it was once popular in?" As we already showed on the Google analytics table above, unlike Mr. Slander said, the United States is still largely the first country per Clubshop visitors with a 33.49% share. Apart from that, as all old Clubshop Partners know, since 2016, Mr. Burke, the founder and previous Clubshop's owner, had almost abandoned the company management.
		Proprofit Worldwide Limited acquired Clubshop in 2018. The new management decided to start from scratch and rebuild the entire business to offer a brand new and enhanced platform to Clubshop's Members.

Namely that ecommerce in the current business model is just a cover. Whether the platform is marketed or not is neither here nor there.	 What we kept is the unique business model because it's much more than viable. It's awesome! Since then, we keep improving it every day. <i>1. "Online shopping is as big as ever, so the problem obviously lies with ClubShop."</i> The reality is that there is no problem at all. Clubshop is growing again like crazy, despite its detractors like this slander we've examined here. <i>2. "Namely that eCommerce in the current business model is just a cover. Whether the platform is marketed or not is neither here nor there.</i> The reality is that the eCommerce platform is the center of gravity of the entire Clubshop's business model. As per its business plan, Proprofit Worldwide Ltd will make significant investments to enhance the eCommerce platform. Especially after completing the first phase of its expansion. We're incredibly grateful to every person who keeps trusting us while, with the Lord's help, we're building the best people's business ever conceived, despite the obstacles, the negative people, the slanderers, and the fake reviews industry. Thank you. We love you, folks!

03 Trust Yourself

Believe in the process!

Believe in the process and always bear in mind the obvious truth:

You can't harvest the fruits before sowing the plant!

And once you sow it, you don't expect to eat the fruit fifteen minutes after. You need to water and take care of it.

And if you do that with love, you'll have a better crop.

So is making money with your Clubshop business. It's a process, a lovely journey. Not an event.

So, have faith, start sowing today, and enjoy the journey.

You'll start reaping the fruits when you'll deserve them.

"You don't need to eat the corn today."
